

Strategic Risks Register – Quarter 2 2021/22

Introduction

Risk Management is an essential element of corporate governance arrangements. The process of risk management allows the Council to identify, prioritise and mitigate risks which may have a negative effect on services. This is an important and underpinning process which ensures good value for money and also continuity of services.

Risks are recognised as essential management information and so contribute towards decision making. This document lists all those risks which are considered as strategic in nature – in other words those risks that could have a wide impact or require senior management control.

This Strategic Risks Register is reviewed and updated every quarter by Corporate Management Team. Risks above the line of ‘risk appetite’ are a priority and so are reviewed every quarter – whilst those below risk appetite are reviewed once a year.

Strategic risks are by their very nature problematic and so can remain on the register for significant periods of time.

[Page 2 explains the Risk Matrix](#) with Likelihood, Impact and green/blue zones.

[Page 3 contains the ‘Heat Map’](#) which shows the distribution of risk on the matrix – providing an ‘at a glance’ view of all risks.

[Page 4 contains the Strategic Risk Register](#)

How to understand the Risk Matrix:

This register contains the full and complete list of the Council's Strategic Risks. Each risk is plotted on a risk matrix to show the degree of likelihood and impact. The greater the likelihood and impact the higher the priority for management. Those risks which lay above the line of 'risk appetite' can be seen in the blue zone of the matrix. These risks are a priority for management and are reviewed every quarter. Risks below the risk appetite, in the green zone, are a lower priority and so are reviewed on an annual basis.

Likelihood	High				
	Medium			X ←	
	Low		X ←		
	Very Low				
		Negligible	Marginal	Serious	Critical
	Impact				

Risks positioned in the blue zone of the risk matrix are above 'risk appetite' (high priority) and require quarterly mitigation and management. Mitigation updates are listed for these risks.

Risks positioned in the green zone of the risk matrix are below 'risk appetite' (lower priority) and require an annual review in Quarter Four.

Risk 'Heat Map' - showing the current position of all risks in this report

This matrix provides an 'at a glance' view of the priority risks which are positioned in the blue zone and so are above the line of risk appetite.

Commentary: Following a review of the Strategic Risks for Quarter 4 2019/20 it was found that 65% of risks were above appetite. This significant change was due to the pressures brought about by Covid-19. The review this Quarter 2 2021/22 shows that improvement continues - now with a significantly reduced 19% of risks positioned above appetite. These above appetite risks are reviewed at least on a quarterly basis.
